

A COMMUNITY WITH A SHARED FUTURE FOR MANKIND
Project Sketch by Francesco Mariotti October 2020

The sculpture that I propose for the Olympic and Paralympic Winter Games
Beijing 2022 bears the title

A COMMUNITY WITH A SHARED FUTURE FOR MANKIND.

The sculpture symbolizes a tree as a metaphor for life.

It changes its colors interactively with Meteorological datas.

In cold weather, the sculpture glows blue and white
JOYFULL RENDEVOUS UPON PURE ICE & WATER.

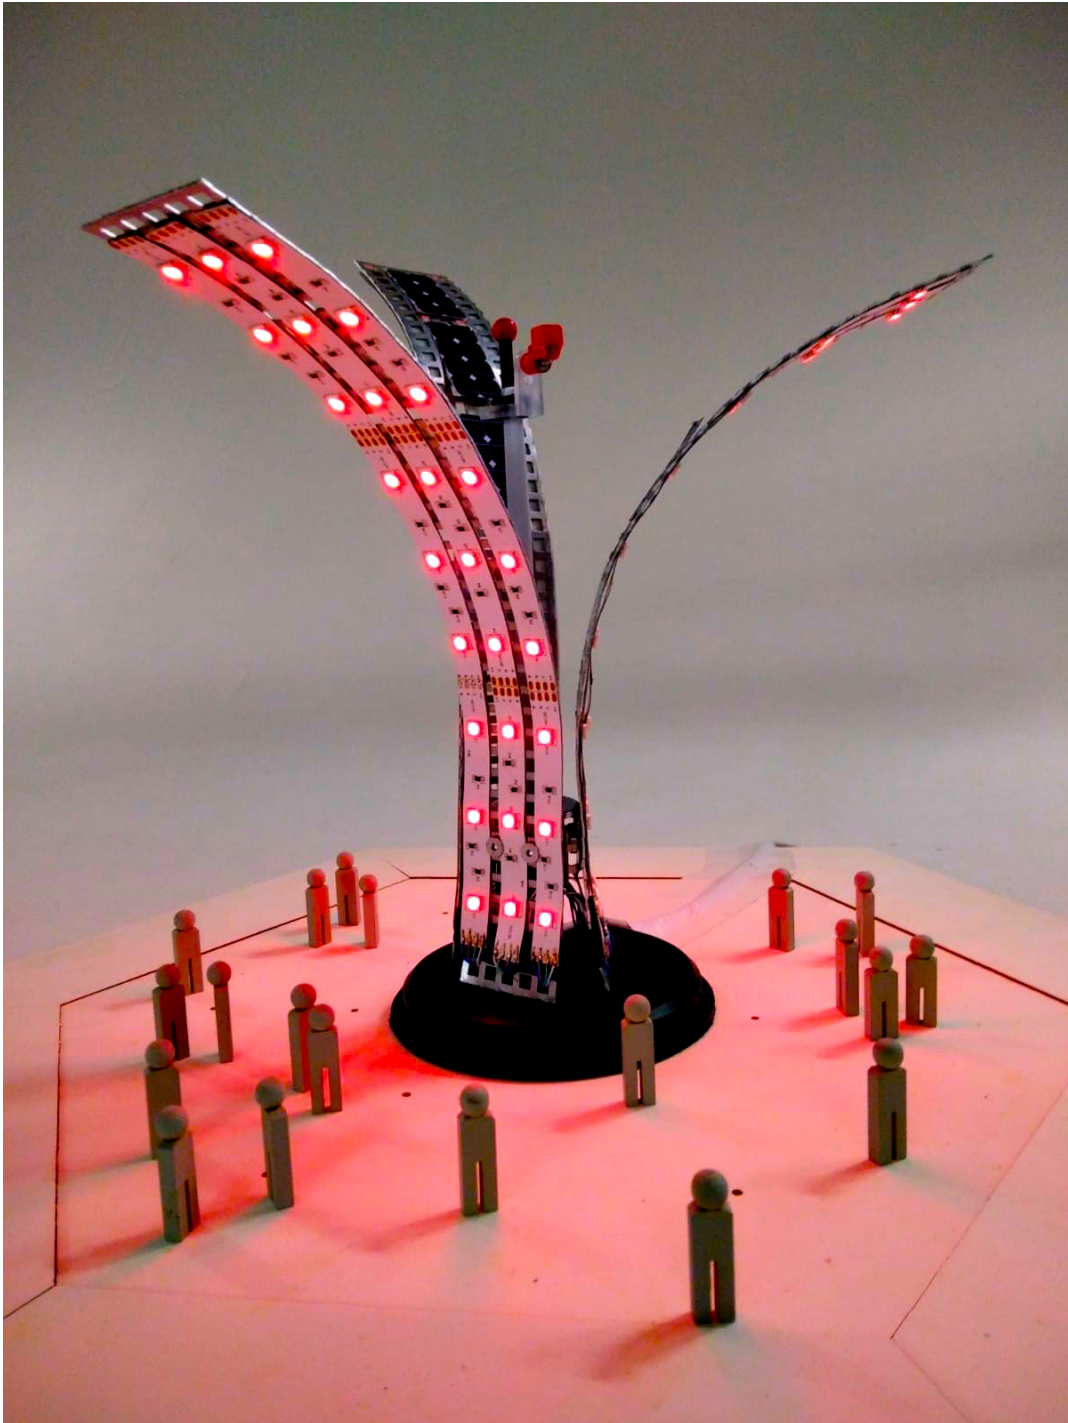

When the weather is fresh, the sculpture glows green

GREEN, SHARING, OPENESS AND INTEGRITY.

In warm weather the sculpture lights up red

LET THE OLYMPIC FLAME LIGHT UP THE DREAMS OF YOUTH

In addition, the sculpture starts to flash when wind blows a

DANCE SPECTACLE OF LIGHT.

The sculpture is autonomous and is powered by solar modules integrated in the structure.

During the day, sunlight creates a changing

MUSICAL SOUNDSCAPE

made up of various digital sounds that are generated by the mutation of light intensity.

The sculpture should have a height between 10 and 20 meters.

The choiced Location ist 11 TAIZICHENG SNOW TOWN considering the reflection of Light in the Water.
